SUMMARY

"As a Computer Science graduate and cybersecurity enthusiast with strong programming skills and foundational knowledge in networking and operating systems, I'm currently expanding my expertise by pursuing an MSc in Cybersecurity. I have hands-on experience with programming languages such as Python and Java. I've built a strong foundation in logic, problem-solving, and algorithmic thinking, and I'm building a deeper understanding of networking protocols and system administration. While I'm still growing in the field of cybersecurity, my technical foundation and eagerness to learn make me excited about securing systems and protecting data in an increasingly digital world. I'm motivated to apply my programming skills and growing cybersecurity knowledge to real-world challenges as I continue my professional development."

KEY SKILLS

Networking Basics: OSI Model & TCP/IP, Subnetting & IP Addressing, DNS, DHCP, VPN Concepts, Basic Routing & Switching
Cybersecurity (Learning Stage): Security Fundamentals, Basics of Ethical Hacking, Common Threats & Vulnerabilities, Encryption & Hashing Basics.
Tools: Kali Linux, Wireshark, Nmap, Burpsuite, Metasploit
Programming Languages: C, Python, Java, Javascript, HTML, CSS, Php.
Database languages: Mysql, postgresql

SOFT SKILLS

Logical Thinking & Analytical Skills
Attention to Detail
Self-Learning & Curiosity
Time Management
Communication & Collaboration

EDUCATION

Master of Science (M.Sc.) in Cybersecurity *(Pursuing)*
Savitribai Phule Pune University, MIT ACSC college, Pune(2025 – Present)
Gaining knowledge in cybersecurity principles, threat modeling, and ethical hacking, Learning tools and techniques used in securing systems and networks

Bachelor of Science (B.Sc.) in Computer Science
Savitribai Phule Pune University, Christ College , Pune(2022 –2025)
Computer Networking, Operating systems, Web development.

CERTIFICATIONS

Certified Ethical hacker(CEH) by EC council (Currently pursuing-2026)

LABS

Solved 20+ labs on tryhackme platform:
Related to different tools in cybersecurity, labs related to basic fundamentals of cybersecurity
Home lab setup:
Practicing different kali linux commands of wifi cracking, exploiting remote access to other machine in a ethical manner(Own device)
